FOUNDATION #9

March 17, 1986.

FOUNDATION is the organ of the Granite Archive; published by Gamesmasters Publishers Association and Edited by W. Elmer Hinton Jr., 20 Almont St., Nashua NH 03060. FOUNDATION was established to aid in the collection and preservation of postal-game hobby information through the establishment of the Granite Archive, and through promotion of availability of the information held therein.

Welcome to another issue of FOUNDATION and the start of the Granite Archive list of holdings. By knowing what I have, you will know what I want. Before I start, a brief introduction.

This issue will fall very near Kaissa so I will be mailing all of this issue with Kaissa, for convenience. I still am looking for two assistants to help me with the archive. The Postal Locator and Honorable Mentions will be on page 4.

GRANITE ARCHIVE LIST

This is an alphabetic listing of some of the Granite Archive inventory. Zines that have anything to do with gaming are welcome. Zines with no name or a conspicuous blank are listed after "Z" ends.

Each listing is followed by the editor and/or publisher (the main person identified with the zine) underlined. Volume numbers are marked "v", serial numbers within a volume are marked "n"; whole numbers of the series are marked "#". Any corrections appear in parenthesis immediately following the number which was on the issue in question. Dashes indicate series of holding, while semi-colons indicate a break in the series. I means I have all issue of a zine. ! means The last numbered issue was the last issue of that zine (as

far as I know). ? anywhere means uncertainty about whatever it immediately followed.

An asterisk "*" is used for footnotes; to denote service zines (the service will be named) or to note an item of interest explained under the listing for that zine.

Some zines are better known by thier initials or are named with an acronym. If so, the main name appears first in the listing, followed (in parenthesis) by the alternate.

Now, part one of the archive listing.
